

Chain: Smart Web Hyperlink Injection

David Song, Dominic Roser, Sean Ozinsky

CSE 481 – SP 25

Motivation

Chatbot based AI is often non-optimal for tasks like website exploration, which involve branching paths ill-suited to chronological conversation. We are exploring in-context interaction, distinct from chatbots, by turning websites into Wikipedia-like resources. This is achieved by inserting hyperlinks informed by the browser history, predicted goal, and persona, with hover-over contextual summaries.

Approach

Scenario 1 (UW Football Offense Inquiry)

the early 2000's, is set to visit Utah, Kansas, Oklahoma, and UCLA along with the UW visit. The Huskies already have 3 defensive backs committed in the 2026 class and they would

The Washington Huskies are actively recruiting for their 2026 football class, securing commitments from several players, including offensive lineman Kodi Greene and quarterback Derek Zammit. They are also targeting other highly-rated recruits across various positions to build a strong future class. Sources: 1, 2

3 star offensive lineman Dominic Harris from Ed W Clark HS NV is one of the top

Scenario 2 (UW Football Defense Inquiry)

the early 2000's, is set to visit Utah, Kansas, Oklahoma, and UCLA along with the UW visit. The Huskies already have 3 defensive backs committed in the 2026 class and they would

The Washington Huskies' 2026 recruiting class is actively being built, with several key commitments already secured, including a highly-rated quarterback and multiple defensive backs. The team recently hosted numerous recruits for official visits to strengthen the class. Sources: 1, 2

3 star offensive lineman Dominic Harris from Ed W Clark HS NV is one of the top

Configuring different personas leads to tailored keywords and summaries
